[Under The Door Lever Opening Tool: Full Version Free Software Download](#)

Detailed Uses

This tool has one use, and it does it well. It goes underneath a door and pulls on the lever on the inside. The inside lever on many types of security hardware is left open in case of emergencies and for convenience - even when the outside lever is locked. As a note, try to not keep the tool bent all the time. Hang it up or put it on a shelf. When you are ready to go, bend the tool to fit in the bag and put it to use!

Step 1:
Insert tool under the door

Step 2:
Work tool over the latch

Step 3:
Pull down on cable to open the door
